

Dear Dr. Henney,

I am writing to express my concern over the FDA's regulation of genetically engineered (GE) food. I request that the agency's current policies be changed, and I support all the points in docket #00P-1211\CP1

GE foods should be labeled so I am informed and have a choice.

GE foods should not be assumed to be generally recognized as safe and should have mandatory pre-market safety testing

☒ There should be a moratorium on GE foods until long-term studies show they are safe for human health and the environment.

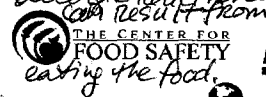

(Additional Personal Comments:)

*Genetic engineering of foods  
people are allergic to but don't know have  
been "added" to the "seed" can be dangerous, as an  
allergic reaction can result from  
eating the food.*
